

BlackWatch Studios is pleased to announce:

A full day intensive workshop:

**April 24<sup>th</sup> from 9:00 am til 7:00 pm**

This is an exciting all day workshop for those who either want to begin learning, or brush up on the **fundamentals of photography lighting with a concentration on studio portrait lighting.**

Using a combination of theory and practical exercises, each student will bring their camera to the class, set up and meter lights, and take pictures of professional models. There will be a variety of lighting setups that students can later recreate from diagrams and pictures.

### **Module I- Basics of exposure.**

A quick review of exposure principles for the camera including shutter, aperture, and ISO. Also tips on settings for different types of shooting.

### **Module III- Flash Photography-**

Covers the interesting subject of flash photography, how it differs from natural light and the different techniques that can be used with flash.

### **Module V- Portrait Lighting techniques-**

Learn several different portrait lighting techniques for standing and sitting subjects. Participants will set up and meter lights as well as build their own "Lighting Guide"

### **Module II- The Science of Light-**

Covers light as it relates to photography. Learn how to predict how light will behave in different applications including reflection, diffusion, polarization, power, color, and quality. Understand how shadow can be controlled and used to create a sense of form.

### **Module IV- Lighting tools –**

Each student will learn how to use a light meter as well as learn all about studio lights and modifiers for flash and natural light.

**Cost of class is \$200 per person and includes snacks and lunch.**

**Sign up via email: [Register@blackwatchart.com](mailto:Register@blackwatchart.com)**
